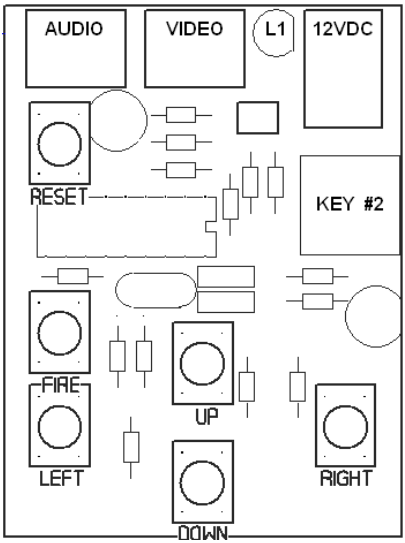
User manual

How to setup



The first thing you have to do is to plug the RCA cable in to the VideoGameKit board's **VIDEO** and **AUDIO** inputs and plug the other side of the RCA cable to your television.
Plug the 12VDC adapter to your VideoGameKit circuit and plug the adapter into the 230V AC network. If everything works fine the **L1** LED lights on the board.
Switch on the television and change the chanel to AV to see the signals from the video input.
You should see the Tetris game now and you can start the game with it. If you want to restart the game just press the **RESET** button on the board.
There is a **KEY #2** pinout on the board you can connect extra keyboard if you want to play with a two players game.
You can write new games for the VideoGameKit, please ask the more detailed information about this.
